Subject: RE: Resending Draft 1-Page IIG Table for Caucus Briefings

Dear Kamyar & staff,
I love this new one page IIG Table.

My only comment is that I agree with Alex, Water Transfers should not be counted as a Potential Benefit -- my reason for this is that there is likely to be double counting. As it happens, facilitate water transfers is an AWMC EWMP, thus water made available for transfers is likely to be counted under Ag Use Efficiencies. Fallowing is now showing up under Ag Stewardship -- although I understand that this item will not have a potential benefit entry.

Mike Wade -- please bring this item forward for Ag Caucus consideration.

Thanks for this good work.

Anisa

Subject: Resending Draft 1-Page IIG Table for Caucus Briefings
Importance: High

AC Members:

I sent this email yesterday to the AC Caucus leads and I'm now resending it to all AC members.

Staff has prepared a draft 1-Page version of the Implementation and Investment Guide based on AC suggestions during the past few weeks. I have attached this document for your review for this week's caucus briefings to get your feedback before Friday's AC meeting. We have not posted this document on the AC meeting materials because we want to see if the proposed 1-Pager addresses remaining concerns about the 2-

Page version included in the current draft of Chapter 1. Based on your comments, we will decide if the 1-Pager is ready for discussion at Friday's AC meeting.

At the caucus briefings, we will go over the AC meeting materials posted at:

<http://www.waterplan.water.ca.gov/b160/committee/meetings.html>

Please let me know if you have questions – see you soon.

Take Care,

Kamyar
